- Express.js
- React.js
- HTML, CSS, EJS
- Bootstrap
- MongoDB
- PostgreSQL
- Git, GitHub
- AWS
- C++ (basic)
- Java (basic)
- Python (basic)

## ABOUT ME

Dedicated MERN stack developer and recent B.Tech graduate, deeply enthusiastic about crafting innovative web solutions. Eager to further immerse myself in this dynamic field, I offer unwavering commitment and collaborative spirit in any environment and situation.

## EXPERIENCE

### • Ethical Hacking & Cyber Security (Torc Infotech Internship)

Interned in Ethical Hacking & Cyber Security, focusing on identifying and addressing security vulnerabilities. Conducted penetration testing, vulnerability assessments, and contributed to enhancing organizational security measures.

### • Introduction to User Experience Design (Coursera Internship)

Completed Coursera's Introduction to User Experience Design course, gaining foundational knowledge in UX principles and methodologies. Explored topics such as user research, prototyping, and usability testing, equipping myself with essential skills to create intuitive and user-friendly digital experiences.

## PROJECTS

### • PRECIZN - Ecommerce web application

Independently developed Full-Stack E-commerce Watch Store project, immersing myself in both backend and frontend domains to understand their seamless integration. Leveraging cutting-edge technologies, I ensured a flawless shopping experience.

### • ESPER - Image Super Resolution

Contributed to a team project developing Image Super Resolution software, which utilizes Generative Adversarial Networks to enhance low-resolution images to high resolution.

### • SHEF - Recipe Website

Collaborated on a team project—a Recipe Website enabling users to search for recipes based on available ingredients.
